CLARESHOLM LOCAL NEWS

Mrs. Godley and children have returned from their holiday trip.

Edgar Gibbie has been in the local hospital for a surgical operation.

Mr. and Mrs. J. T. Kingsley have returned from their western holiday trip.

Chas. Leeds returned on Saturday evening last from his trip to the old country.

Dr. McMillan and family left the first of the week for a vacation outing at Banff.

Miss Violet Boniface is in the local hospital having undergone an operation for appendicitis.

Mr. and Mrs. John Amundsen have been taking a holiday trip over the Banff-Windermere highway.

Betty Compson in "New Lives for Old" at the Rex theater on Friday and Saturday nights this week.

Mr. and Mrs. G. R. Maxwell and family returned today from a five weeks' motor tour in the States.

Miss Thelma Brown of Stavely is in the local hospital where she underwent an operation for appendicitis.

Mr. and Mrs. O. L. Reinecke and daughter returned last week from their motor tour in the western states.

John McIntosh, of the C.P.R. staff, left last Saturday morning with Sid Lewis for a vacation trip to British Columbia and Sarajevo.

Mr. and Mrs. J. D. Dickmeier returned last Saturday morning from Holland where they have spent the past seven months.

G. G. Coote, of M.P., was the guest of honour at the annual convention of U.F.A. members at Macleod on Monday last to contest the Macleod constituency in the approaching Dominion election.

R. G. Bissett will sell horses and farm machinery by public auction at the Valentine Avenue Barn, Claresholm, Saturday afternoon, August 11. For full particulars see sale bills. A. E. Rumons, Auctioneer.

Mr. and Mrs. Sid Lewis and family left on Saturday for a three weeks' motor trip through British Columbia where they will visit relatives. They will travel over the Banff-Windermere road and will stop for a time at Banff.

For driving a motor car after sunset without lights, John Crawford was fined \$10 and costs. For the further offense of not having a license, he was fined another \$10, with costs. For not having headlights on his car Dean Wagner was fined \$5 and costs.

Mr. and Mrs. N. Holmes returned last Saturday evening from a two weeks' tour in the north, having visited Edmonton and several towns on the Canadian National Railway, including Wainwright with its newly opened oil field and the big buffalo park.

Grain cutting started the first of this week here, and in another three days will be general. This year is the earliest harvest on record in this district. The continued dry warm weather has matured the grain here much faster than seemed possible ten days ago.

Jenkins-Strangways

A very quiet but pretty wedding took place in Knox United church, Calgary, on Monday afternoon, July 27, at 4:15 o'clock.

John Jenkins, son of Mr. and Mrs. Edward Strangways, Claresholm, became the wife of Roy Wesley Jenkins of Alberta. The ceremony was performed by Rev. George A. Dickson. The couple were unattended. The bride was charmingly dressed in a navy pointed suit with russet necklace, the gift of the groom. They will make their home at Banff, and on their return Mr. and Mrs. Jenkins will take up their residence at Stavely.

Canadian Pacific Crop Report

Winnipeg, Aug. 2.—Fairly general showers over the major portion of east western prairie during the past week has proved favorable to late grain and has been an important factor in helping grain to fill and to retard rust development, according to the weekly crop report of the Canadian Pacific Railway agricultural department.

Rust is fairly widely distributed in the southern parts of both Manitoba and Saskatchewan but reports would indicate that very little damage has been done and it is expected that grains will not suffer badly if present weather conditions continue for the next week or ten days. Earlier sown grain appears to be beyond harm from rust. Saw fly is reported working at some points in Manitoba and Saskatchewan but is more prevalent than in the average year and the situation is not at all alarming.

Grass cattle continue to come forward in large numbers to local market and prices on unfinished stock have declined. Hogs are bringing good returns with prices showing improvement.

In Alberta showers have been fairly general over the southern parts of the province but were very light. Rain of the previous week and local showers since have considerably freshened the crops and were helpful in the southern prairie where grain, though damaged, had a chance for recovery. Rye threshing has commenced at Purple Springs, British Columbia.—Loganberries are at their height and are marketing heavily. Transparent and Duchess apples are on the market and are sizing well. Apples, early peaches and peach plums are starting to move in small quantities, also semi-ripe tomatoes. From Kootenay and Arrow Lake districts Royal Ann and Arraw cherries are beginning to move.

ELK ORGANIZER

TONY MCKINLEY

Tony McKinley, Provincial Grand Organize for the Benevolent and Protective Order of Elks who is here forming a lodge, thinks that prospects are for a lodge well over one hundred, and that applications are now being taken.

Tony is well known in sport circles, having been prominently connected with hockey and lacrosse teams in the capacity of manager several years ago. He has also written sport and other articles for the Calgary papers.

Elkdom, he says, is taking a wide hold in the west and soon will be a tremendous influence in the fields of charity, child welfare, work, and sport. Funds are raised for these purposes by carnivals, amateur plays, and in other ways.

Elkdom recently raised \$4,000.00 for charitable purposes in a three day camp.

Mr. McKinley says that Dr. G. D. Stanley, ex-M.P.A., a prominent man, has consented to come here to speak in the interest of the order if a suitable date can be arranged.

Don't Get Sunburned

A light application of Nyal Face Cream before exposure will effectively prevent sunburn, tan and skin irritation. This delightfully refreshing cream also soothes and heals inflamed skin, dries in quickly leaving no trace and makes face powder adhere better.

Canadian Trade Prospects

With the close of the first six months of 1925 financial and commercial publications in Canada have been taking stock of the business situation throughout the Dominion. The conclusions reached by them as the result of careful survey is that present conditions are better and prospects for the immediate future more promising than for some years past. This is especially true in regard to agriculture, and, as the West has always contributed so largely to the national outlook has a direct beneficial effect on manufacturing and all business.

Although actual returns from the farms are problematical until the crops are harvested, and it is never safe to closely estimate yields of grain and field crops until they are finally removed from all vagaries of weather, plant disease and pests, the fact remains that at the end of June prospects throughout the country, especially in the western Provinces, were better than for many years and, in the absence of widespread and extremely adverse conditions before harvest, the outlook is for one of the best and most profitable crops in ten years.

Our financial paper in its annual review at the end of June states that the list of reports from all the provinces, the biggest industrial employment areas, is very encouraging, with the exception of Quebec where, as always, the unemployed always congregate; there are five million manufacturing industries are busier than for years and in Ontario and Quebec real activity prevails with manufacturing near to capacity in several lines and some planning for expansion.

The shipping of coal from our Atlantic and Pacific seaboards has taken place, liquidization is increasing, the summer tourist traffic shows every indication of attaining a new high record, while the export trade of the Dominion continues to increase both in volume and value monthly by month. Building construction is likewise much greater than a year ago. Railway earnings are up 10 per cent., but still far below what was attained during the first year of grain crop and reduced in the movement of coal resulting from labor troubles at the mines. On the other hand, there is a substantial increase in car loadings of manufactured articles and general merchandise, while this year's grain crop promises to more than offset the reduced "shame of a year ago."

On the significant development is the steadily rising volume and variety of Canadian exports.

For some time now the Dominion Government has been quietly negotiating trade treaties with other countries. One of the latest was with Australia and already British Columbia is looking forward to and preparing for a big expansion in trade with that state. Domestically this is reflected in part in the increased interest shown in new trade agreements with the United States which has announced, in much as each and every one of these reciprocal agreements provides for the removal of artificial restrictions on trade through the lowering of customs duties and the wiping out of other obstacles to the free exchange of commodities, and are reasonably accompanied by the provision of larger and improved facilities for communications and transport. In this connection the growth of Canada's maritime assets and, as re-stated in the late column, that is exactly what a young and developing country like Canada requires.

Free trade and wider markets are bound to bring about the Dominion's developmental leading to increased employment and production and resultant prosperity.

A young country like Canada with a comparatively small population, having resources and productive powers, and producing far more than its own people can consume, and also possessing manufacturing and other industries with capacities for production far in excess of the needs of home population, stands in need, not only of the protection of its limited home market, but also of a favorable position to trade with the world. Any nation that is strong and wealthy, especially trading with others, is that is too much a case of trying to hit oneself by the hour strings. Strength and wealth will come through producing for sale abroad, thus bringing into Canada the wealth derived through the sale of our products abroad.

A Modern Hercules

Tossed Around 600 Pound Safe Like A Toy

An un-sullied "strong man" at Patterson, N. J., with a vocabulary of over two words, is the latest to demonstrate his super strength, having tossed the door off, pulled aside seven policemen and a stone propperte, thrashed through a plate glass window, knocked two men down and finally was captured, by means of a trap, in a basement. He had been the target of those who believed he had already expressed an intention to jump. There were four branches of the Great War Veterans' Association, and the Tuberculosis Veterans' Association.

The man was unidentified because he could not say "all right." He appeared otherwise sound and was not able to write.

A pianist playing a brilliant number will touch as high as 1,000 keys in a minute with one hand.

War Veterans To Unite

Ten Veterans' Organizations In Montreal To Join League

Would Avoid Any Action Which Could Be Regarded As Aggression In International Affairs

Foreign Minister Trudeau has issued a statement declaring that while the sympathies of the Russians and Chinese are with the side of the Chinese, in all nations members of the proposed Canadian Legion, either by amalgamation or affiliation, S. D. Cunningham, secretary of the Quebec council of the alliance, stated. He said all were agreed to the principles of the Legion.

The statement was prompted by an attack upon Soviet Russia in the English newspapers in connection with the present situation in China. The foreign minister decries that Soviet Russia's intervention in intrigues in China against British trade and against foreigners in general.

Excellent For Group Children.—When a child is suffering with cramps it is a good plan to use Dr. Thomas' Liniment. Oil bathes the liniment and leaves the skin soft and smooth. It gives speedy relief to the little sufferer. It is especially good for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Inflammation, eczema, oil bathes the skin and removes all indispensible of the family medicine chest.

Yellow fever destroyed thousands of Frenchmen in the early eighties, who attempted to dig the Panama Canal.

Chinook Gossip

Miss Ella Hoge, of the Vulcan telephone staff, spent a couple of days with her folks last week.

Jack Wood returned from Victoria last Thursday to take in hawking and threshing again in this district.

The Poverty Ridge Threshing Co. invested in a new Minneapolis outfit a few days ago.

Jack Graham of Lethbridge was in this part of the country last Sunday.

Otto Henker is busy moving a house for A. Swanson from Granum to the new townsite.

Sorenson Bros. bought a half section of land known as the Neilson & Bernard farm from E. Hardtke last Monday. Price \$5,000.

F. Dersch bought the Pitman farm last week; price \$22.50 per acre. He also bought a quarter of a land from F. Hardtke; price \$2,500 per acre.

Algot Ostrom and Harry Johnson got an unarranged bath in Waterton Lakes a week ago Sunday when their boat turned bottom side up. They were having no trouble getting ashore and were forced to swim all the way back to shore. Both are satisfied that they will not have a bath again for many moons.

Wheat threshing has started in some of the southeastern districts of the province.

DEPARTMENT OF THE INTERIOR

PUBLIC NOTICE.—Under the provisions of the Forest Act and regulations governing Dominion Forest Reserves, the Minister of the Interior has authorized the prohibition until further notice of all logging in the following waters in the Rocky Mountain Forest Reserve:

1. Shunda Creek and its tributaries, within the Clearwater Forest.
2. All streams within the Bow River Forest, except the main streams of the Red Deer, Bow and Highwood Rivers.
3. All streams within the Cypress Forest, except the main stream of the Canadian, Livingstone, Columbia and Kettle Rivers, the west branch of the Castle River, and Racecourse Creek from the forks eastward.

W. W. COOK,
Deputy Minister of the Interior
Ottawa, February 23rd, 1923.

Here and There

That a new market has been found for Canadian lobsters, is shown by the report that twenty-six thousand pounds of them, worth about \$78,000, were shipped to Sweden from Halifax, N.S., during the first week in July.

The gold mines of Northern Ontario are now realizing aggregate profits of a million dollars a month, according to estimates compiled at Timmins, Ont. There was a gross total of \$2,650,000 during the month of June.

Six hundred and twenty-four families from the British and other European countries settled in Montreal for August, September and October, according to figures from the Tourist and Convention Bureau of that city.

Quebec is this year enjoying the greatest influx of tourists it has known for a considerable time. Hundreds of motorists, the majority from the United States, are spending their holidays in Quebec, and the Chateau Frontenac's popularity is increasing.

During the course of Western Canada Field Marshal Earl Haig passed through the town on the Canadian Pacific Railway which was named for him several years ago, for the first time. The Field Marshal, in his connection with the town, looked pleased as though he had just won another famous victory.

According to the report of the Department of Agriculture, livestock marketing in Canada during the past year were the best experienced for many years. There were 975,000 cattle, 1,159,000 calves, 3,000,000 hogs, 1,485,000 sheep marketed in 1924, as compared with 882,923; 315,322, 2,362,400 and 512,390 respectively in the previous year.

According to J. M. Gibson, secretary of the Trail Riders of the Canadian Rockies, who recently left蒙特利爾, K.C. President of the Canadian Pacific Railway, to study Canadian farm methods, arrived in Canada on the "Montcalm" this month. They are expert farmers selected by the Minister of Agriculture as members of the Canadian Farmers' Club of Great Britain and will remain in Canada for two months as the guests of Mr. Beatty.

That site, in the Panther River country, not far from Banff, are rapidly increasing in number and may possibly become a mecca as is the opinion of Belmont Brown, an authority on trout, who recently returned from a hunting tour through the Rocky Mountains. Mr. Brown is regarded as an authority on wild animals and states that there will be ten years from now, 10,000 elk in the district, unless steps are taken to decrease their numbers.

That 62,000 harvesters would be required to handle this year's crop, of which 10,000 would be expected to supply 800,000 bushels, was estimated at last week at a conference of various government held in the Canadian Pacific offices at Winnipeg, the meeting of the Canadian Pacific Board of Directors taking all necessary steps to recruit the army of harvesters. Their coldest cars and special equipment has been overhauled and the company is now fully prepared for its annual rush of harvesters.

George Morris Bewshur, chairman of the Canadian Pacific Board of Directors, died in London, England, on the morning of July 20th, from septic poisoning following an operation for appendicitis, was with the company almost 40 years.

He was 70 years old when he died, following the Canadian Pacific Railways in 1882 and was head of the head office of the Canadian Pacific for seven years. The son of Mr. Bewshur, George Morris Bewshur, chairman and president of the company, stated that in his opinion Mr. Bewshur had had no equal in the country as an manager of railway traffic and added that the company deeply regrets the passing of another of the old guard, whose ability and effort so largely contributed to the company's success.

French-Canadian agricultural experiments, designed to interest other farmers in the country under auspices of the University of Montreal, express unanimous agreement at the agricultural development of British Columbia, and particularly the prairies of Manitoba, the beauties of Northern Ontario and the vastness of the country in general. A similar excursion left Toronto recently, the Canadian and British Columbia delegations taking a tour through the Rocky Mountains. Their coldest cars and special equipment has been overhauled and the company is now fully prepared for its annual rush of harvesters.

Here and There

According to the official records one hundred and thirty whales have been caught by the Victoria, B.C. whaling fleet so far this season. The whale which is the most plentiful this year.

It is reported generally that over one hundred and fifty thousand people attend the C. C. Stampede this year. A historical pageant more than five miles long was the opening feature of the jamboree.

With an estimated attendance of five thousand each, twenty conventions have been booked to take place in the city during August, September and October, according to figures from the Tourism and Convention Bureau of that city.

It is expected that when Hon. Henri Mercier, Minister of Lands and Forests, arrives in Canada, the thorough organization of the aviation branch of the Quebec Lands and Forests Department will take place. It is believed that the forest is to be opened up and around Quebec, the forests will be used more hydropower, to be used for forestry research work, as well as for combatting forest fires and other work.

Church dignitaries, statesmen and thousands of laymen segregated in ancient Quebec to be present at the wonderfully impressive ceremonies attendant upon the burial of the late General Beauchamp, who, which had only recently been reconstructed and opened to the public, presented a scene of colorful beauty and majestic dignity while the profoundly sorrowful services were being recited.

At this year's Cross-country Ride the Powwow of the Trail Riders of the Canadian Rockies, who recently left蒙特利爾, K.C. President of the Canadian Pacific Railway, to study Canadian farm methods, arrived in Canada on the "Montcalm" this month. They are expert farmers selected by the Minister of Agriculture as members of the Canadian Farmers' Club of Great Britain and will remain in Canada for two months as the guests of Mr. Beatty.

That site, in the Panther River country, not far from Banff, are rapidly increasing in number and may possibly become a mecca as is the opinion of Belmont Brown, an authority on trout, who recently returned from a hunting tour through the Rocky Mountains. Mr. Brown is regarded as an authority on wild animals and states that there will be ten years from now, 10,000 elk in the district, unless steps are taken to decrease their numbers.

That 62,000 harvesters would be required to handle this year's crop, of which 10,000 would be expected to supply 800,000 bushels, was estimated at last week at a conference of various government held in the Canadian Pacific offices at Winnipeg, the meeting of the Canadian Pacific Board of Directors taking all necessary steps to recruit the army of harvesters. Their coldest cars and special equipment has been overhauled and the company is now fully prepared for its annual rush of harvesters.

George Morris Bewshur, chairman of the Canadian Pacific Board of Directors, died in London, England, on the morning of July 20th, from septic poisoning following an operation for appendicitis, was with the company almost 40 years.

He was 70 years old when he died, following the Canadian Pacific Railways in 1882 and was head of the head office of the Canadian Pacific for seven years.

The son of Mr. Bewshur, George Morris Bewshur, chairman and president of the company, stated that in his opinion Mr. Bewshur had had no equal in the country as an manager of railway traffic and added that the company deeply regrets the passing of another of the old guard, whose ability and effort so largely contributed to the company's success.

Where Ardent Anglers Seek Quebec's Fishing

VAL MONT BEECH TROUT TWO FEET LONG

ON A LAURENTIAN LAKE IN QUEBEC

BIG 14 LB. GREY TROUT FROM A LAURENTIAN LAKE

An army of anglers is preparing for the annual fishing expeditions to the province of Quebec, where there are 200 lakes, as well as lakes of every size and shape, and where there are 1,000 rivers. One Quebec fisherman, always a Quebec fisherman, The operator of the outfit for which the sport is May 1st, and a week earlier the day before, to be the first to land a trophy.

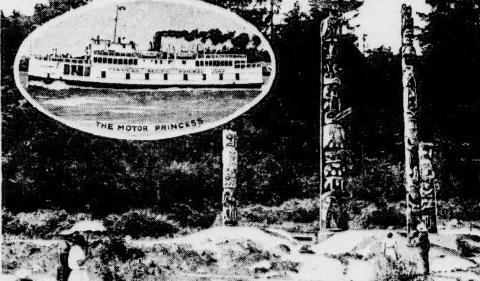

These trout are particularly desired and the fisherman who hooks a large one of this fishing species is considered lucky. There are numerous waters that yield good trout generally. Those that are best known are the streams of the Mont Laurier branch of the Canadian northwest of Montreal into the Laurentian Mountains. These streams can take you from either side of the railway to the water. Lac des Ecorces, which is 4 miles south, with one hotel and a dozen houses, is a favorite spot. You can good sport catching pike, dace and "whitetails", as locally known. Lac du Loup, 10 miles south of Mont Laurier, is a charming lake 10 miles in circumference and contains 27 islands, many of them covered with timber. The lake is 10 miles long and 3 miles wide. The water is clear and the trout that inhabit it are excellent. The lake is situated between St. Jerome and Mont Laurier, and the fisherman who catches a trout here is likely to find excellent fishing grounds. Some of the most popular streams are those that flow into the surrounding waters. St. Jovite, with the popular Grey Rocks Inn, is another lake that yields good trout; for the natives are enthusiastic about the fishing. It is 10 miles from Lac du Loup to the north famous for its trout.

Several fishermen's hotels provide accommodations for visitors, who can get a room and a comfortable lodge for about 15 guests here. Lake Cochran, a 15 miles from Lac du Loup, is opposite Lac Mercier, opposite the station, is noted for its fine trout fishing. Labelle, a 100 miles north, is the centre of a maze of streams that offer good trout fishing, while 23 miles further on, is Nominingue, which is noted for its trout. The name means "waterfall". Monster fish weighing up to 30 lbs. are caught here. Many streams from these lakes are located six fishing clubs.

Evening at the stations, the

provides accommodations at reasonable rates for visiting fishermen.

The Billingham Ferry that meets all the Autos

THE MOTOR PRINCESS

Trotton Park, Vancouver

Have you ever heard of Cl-o-ose? Cl-o-ose is not a name, but it is not Chinese for chewing-gum. It is, as a matter of fact, the name of a small island in the Gulf of Georgia, off the coast of Vancouver Island. It is a small, rocky island, about 100 acres in extent, and is surrounded by a dense growth of timber. It is a favorite resort for tourists, they have not, however, entirely abandoned the practice of sealing, which is still carried on. They have not, however, entirely abandoned the practice of sealing, which is still carried on.

Indians (who have become so used to tourists, they have not, however, entirely abandoned the practice of sealing, which is still carried on.

This coast is yearly becoming more popular with tourists from the South. California, Seattle, San Francisco, and Victoria, the capital of the province, and thence north to Nanaimo, Cl-o-ose or any of the other attractive spots.

The Island is reached by means of a ferry-boat, "The Motor Princess"—operated by the Canadian Pacific Railway Company. The Island is situated in the Gulf of Georgia and is connected by a causeway to the mainland highway across the Gulf of Georgia and on to the Island highway, which can follow south to

Victoria, the capital of the province, and thence north to Nanaimo, Cl-o-ose or any of the other attractive spots.

It is an extremely pleasant trip, full of interesting cut-out-of-the-ordinary sights and anybody who has toured the coast of the Pacific Northwest, and Cl-o-ose—ought to tour it again and correct a most unfortunate omission.

Canada's Salt Producing Areas

Bulk of Canadian Salt Output Is Produced in Ontario

Canada last year produced 297,196 tons of all grades of salt, of a value of \$1,359,614, the net value of packages. During the same period 171,852 tons of salt was imported, of which 67,945 tons was for the use of the sea or gulf fisheries.

Actually 97 percent of the Canadian salt output is produced in Ontario in the counties on the southwestern frontier, where a number of substantial industries have been built up at Windsor, Sarnia, Sault Ste. Marie, Goderich, Guelph, Waterloo, Kitchener, and Cambridge. The salt of this district is remarkable for its purity, which has been a favorable factor in extending its market, as also cheapening its refining.

The salt produced in Ontario is also very much passed through one hole at Goderich. Its depths of from 900 to 1,000 feet, and some of the beds are 100 feet in thickness. The salt is recovered by evaporation, and is then broken up, forcing water under high pressure down the bore holes to the salt beds and then pumping the brine back to the surface.

Salt springs yielding weak brines are to be found in many places in Nova Scotia and New Brunswick, but no commercial use has been made of them. The first discovery of rock salt in the Maritime Provinces was made in 1820, but little can be learned from it. Mining was commenced in 1919, and each year there has been a growing production of rock salt, which is ready market in the salt curing industry of Nova Scotia and New Brunswick.

A recent suggestion of Dr. Frank T. Shattuck, chemist of the Dominion experimental farm of Ottawa, would be organized to establish a mineral salt market for this Nova Scotia salt. Very large kyanite crystals are raised in the province, particularly the dyke-langs at the head of the Bay of Fundy. Still, salt interests are the only way to give substance to our country and to France, property to this country and peace to Europe.

Let us be done for ever with military alliances.

Let us withdraw our men who are eating their hearts out.

Let us stand by the beaten path.

There is no compunction in the matter.

Either business must be organized for peace or war it must be organized for peace.

It is the only way to give substance to our country and to France, property to this country and peace to Europe.

In northern Alberta a number of salt springs have been tried for salt supply. In 1920 a limited amount of rock salt was made by drilling to a depth of 468 feet at McMurray. Development of this first commercial shipment was made recently from the new plant at that point.

'Old Engine Comes To Life

Takes Living Role At Centenary Fair In London

Scenes attendant upon the opening in 1822 of the first railway in Great Britain between Darlington and Stockton were re-enacted in George Stephenson's locomotive, "Puffing Billy," in the hall of the polytechnic.

The ancient engine, taken from its pedestal in the museum, and given new life for the day, was driven by a gasoline motor concealed beneath the body. Its rust had been cleaned away, and it steamed into the room.

At the throttle was "George Stephenson" in top hat, side whiskers and grey frock coat, and in the iron carriage were several hundred men and women in top hats and crinolines.

The guards wore blue sashes and used the same signals as in the old days; while the train stopped at their favorite halting points for a drink or two, while the travellers waited.

At the opening exercises of the centenary celebration, the Duke of York acted as president, and the speakers were the delegates to the international railway congress, including several Canadians.

A Test

Professor—"How would you tell the height of a tower by means of a barometer?"

Student—"I'd lower the barometer from the top of the tower and then measure the rung."

On Times

"Amongst the folks I met here," says the cartoonist, "was a old-timer who drank hard liquor in winter to keep warm and in summer to cool off. The system finally got him."—Detroit Free Press.

Rays from the Houghton beacon on Eclipse Island, off southwestern coast of Australia, will have a range of 90 to 95 miles.

The Way To Tranquility

To Be Forever Done With Military Alliances and Organize for Peace

Seven years have passed since the war ended, and peace is still unachieved. We are still living in an atmosphere of war, and preparations for war are still in progress.

Why? Because this country has never had "peace" to its masthead. It has never given the wrangling nations of Europe time in which it was our duty to give, and much no one else—America having withdrawn from scene—could give.

If, after the war, we had announced to the world that henceforth we had no military alliances, and only our ally, and that was peace; that never again would we entangle ourselves in military alliances with any nation in our group, then we would be the ones who might have influence into the scale on the side of the League of Nations, and that we would be no party to any pact or contract or guarantee outside the League of Nations.

Thus, this Europe would have been at the time, the channels of international commerce would have been cleansed, the burden of taxation for armaments removed, and the world would not be faced with the melancholy fact that the week before last 60,000 workers were added to the ranks of the unemployed.

That is still the only way to tranquility. It is the only way to give substance to France, property to this country and peace to Europe.

Let us be done for ever with military alliances.

Let us withdraw our men who are eating their hearts out.

Let us stand by the beaten path.

There is no compunction in the matter.

Either business must be organized for peace or war it must be organized for peace.

It is the only way to give substance to our country and to France, property to this country and peace to Europe.

Let us be done for ever with military alliances.

Let us withdraw our men who are eating their hearts out.

Let us stand by the beaten path.

There is no compunction in the matter.

WORLD HAPPENINGS BRIEFLY TOLD

A rumor that Sir James Craig was to resign as premier of the north. Irish Government is officially denied. A \$60,000 in bar gold. It also received \$1,000,000 from Holland and \$11,245 from South Africa.

There were 215 accidents reported on Canadian railways during the month of May, resulting in 37 deaths and 1,000 injuries. The accident rate was 2.5, but 27 were injured.

The Panama Canal set off \$14,600,000 profit for the government during the fiscal year which ended June 30, the treasury department announced.

Two hundred thousand persons are homeless as a result of floods in east and west Gaels, according to a Prague dispatch to the London Daily News.

Lossing control of his aeroplane with five other British field, Minot, N.Y., after May 23, of Richmond Hill, N.Y., fell 800 feet to earth and was fatally injured.

King George received Ignace Jan Paderewski, the Polish pianist, at Buckingham Palace recently and conferred upon him the Order of Knight Grand Cross of the Order of Virtuti Militari.

Border troubles between the Soviets and Poles brought a protest from the Russian minister, M. Volkoff, who complained that a Polish guard in Yugoslavia had Soviet territory and lands in a Soviet zone.

Sir Robert Wilmot, who was formerly in the Canadian army and had a fine record in Egypt at Athura and Kharoum, has been appointed a colonel of the Royal Warwickshire regiment.

Broadcast Eskimo Programme

McMillan Northern Expedition Will Attempt Something New

Radio messages from the Arctic show that the McMillan Northern Expedition is well under way. When the McMillan navy's expedition's transmitting station are set up, one within 11 degrees of the North Pole, it is to be another first. Captain F. McMillan, a chief of the scientific party, is to give lectures in a native Eskimo's programme as well as have the voice describe what the expedition is seeing and doing.

It is in the hope, however, in which there is not too much confidence, because it had never been done and only limited observations could be made until next year when radio was first tried in the Arctic. From that experience, however, it is known that wave length equipment has been highly developed for this expedition, the chance of wire transmitting was considerably increased.

Estimates for Defence

Appropriations of Twelve Millions Passes House of Commons

Estimates for the department of national defence, totaling \$12,000,000, were passed by the House of Commons. This is the second time since the war began when the vote for cadre services was under discussion. The amount passed provides for the permanent force, \$4,860,000; the non-permanent active force, \$1,410,000; the air force, \$1,830,000; Imperial war graves commission, \$475,000 and war claims of war claims, \$425,000.

A vote of \$100,000 in the supplementary estimates for artillery services brought an amendment by Robert Poiré, that the amount be reduced. The amendment was lost in division.

Seek To Reduce Losses

Livestock Loss Prevention Association Formed

With the hope of saving some of the millions of dollars of loss sustained from injury to stock in transit, the farmers' federations and the railways in Canada have formed a Livestock Loss Prevention Association. At least 50 per cent. of such losses are preventable, according to officials of the new organization, and the responses showed a general desire to reduce losses, even though divided between producers and the railways. Breeding from sound handling, both in loading and in the cars, is noted as a serious item.

Paris Signs Soviet

Paris society will be required to recognize Ambassador and Mrs. Krassin of Soviet Russia. Mme. Krassin recently tried to give a tea, but none of the invited guests attended.

An attempt will be made to raise large numbers of zebras in Scotland and England. Twenty-three of the animals recently arrived in England.

W. N. U. 1888

Prince May Visit West This Fall

H.R.H. Accepts Invitation to Join Prince Hunt at Niagara

That the Prince of Wales will again be a visitor to Canada is the latest information from Mr. J. G. McNaughton, of Niagara, Ontario, spokesman's representative of the Canadian National Railways. It appears that Mr. McNaughton, an invitee to take part in the Royal Household, will be the first to make a house call, which takes place in the fall, and the reply states that the Prince of Wales would be delighted to join him, and he would be welcome at any time in his visit to the Prince of Wales' ranch, which he hoped would be "next autumn." The letter concluded with a jocular remark that the Prince truly believed Mr. McNaughton would be the last to receive a house call, as he has some reference to an old joke existing between them. Mr. McNaughton became acquainted with the Prince of Wales about five years ago, when he had the three received his first lessons in catching the spiced trout in the Niagara River.

Rushed Cargoes To Avoid Custom Duties

Aeroplane and Seafarers Made Fast

Trip From Paris to London

Cargoes of clocks, watches and silk were hurriedly buried into England last week. They came through the air and over the water. Aeroplane after aeroplane, loaded with cargo, came into port after steamer and mail ported on the same object—land all dutiable commodities possible before the first day of July when the revised McMillan duties took effect.

The custom house at London issued a circular calling for the holding of the port of the greatest air race Britain has ever staged. Every suitable aeroplane left Croydon for Paris in response to a telegram which made it plain that no pilot and passenger machine would be used in a desperate fight with time. All day they arrived with silk from France, and clocks and watches from Switzerland. One machine alone brought 100 boxes of silk and medical supplies and other necessities to deep-sea fisherman along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was present, said that the ship had been held up by the weather and was unable to get to the port. He had been fated out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen.

Dr. Grenfell would join the yacht at St. John's as master, while the expedition, consisting of 120 men, planned to go to Newfoundland to deep-sea fishing along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was present, said that the ship had been held up by the weather and was unable to get to the port. He had been fated out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen.

Bound for Labrador a yacht of 95 tons, only 90 ft. long, named Stratford II, reached Southampton from St. John's yesterday after a 10-day voyage. Starting with medical supplies and other necessities to deep-sea fisherman along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was present, said that the ship had been held up by the weather and was unable to get to the port. He had been fated out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen.

Dr. Grenfell would join the yacht at St. John's as master, while the expedition, consisting of 120 men, planned to go to Newfoundland to deep-sea fishing along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was present, said that the ship had been held up by the weather and was unable to get to the port. He had been fated out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen.

Yacht Has Been Fitted Out For Trip To Labrador

Bound for Labrador a yacht of 95 tons, only 90 ft. long, named Stratford II, reached Southampton from St. John's yesterday after a 10-day voyage.

Starting with medical supplies and other necessities to deep-sea fisherman along 600 miles of the coast. Captain A. R. T. Kirby, her commander, who was present, said that the ship had been held up by the weather and was unable to get to the port. He had been fated out for Dr. W. T. Grenfell by the Royal National Mission to Deep-Sea Fishermen.

Treaty With West Indies

May To Some Extent Decrease Cost Of Living

The conclusion of what is known as the British American trade treaty, entered into a broad preferential arrangement, is hailed as an outstanding accomplishment, calculated to widen markets to Canada, and to help to develop the economy in this country. The arrangement is considered to have an imperial aspect, as well because, like all other countries, the West Indies have been suffering from the post-war depression. Had not this arrangement been concluded, there would have been little hope to look to the United States for reciprocal favors. Now this business is to be kept within the empire.

The treaty means big business for the Maritime ports, which have been suffering. Their most prosperous periods were the days when the East Indian trade was carried on by sailing vessels. For some time past, however, independent modes of transportation of most of this traffic have gone through United States ports for transhipment.

The improved character of the vessel called for by the contract, the greater number of sailing and steamship tonnage, and the extension of the port of entry, will mean the best for Canadian ports. By means of preferences ranging from 50 to 75 per cent., the arrangement affords a market for all kinds of Canadian products, especially manufactured goods, while the island products, hardly any of which are duplicated here, will be saleable in Canada under a 5 per cent. preference.

Following American Fashion

King and Queen Are Wearing Horn-Rimmed Glasses

Broad and conspicuous eyeglasses, long desired by Britons and Americans, are now in vogue. The American "affection" have finally received royal approval in England.

Kings George adopted them recently; Queen Mary followed the international trend. The Queen's eyeglasses were made by the holder of a patent.

British students have been awarded the following: H. J. Fraser, P. A. Macdonald, W. F. Riddell, Manitoba; N. J. Atkinson, J. H. McLeod, Miss E. Parfert, W. Howies, Saskatchewan; L. L. V. Bell, Alberta; J. R. Crozier, A. F. Gill, W. E. Grimes, W. W. Simpson, British Columbia.

"CAPTAIN BLOOD," A Photoplay picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling serial.

CHAPTER XXVII.—Continued

And their own they made her in the end, and at cost of nearly half their numbers. Driven to the quarter-deck, the surviving defenders urged on by the valiant Sir Riviere, maintained their grim defiance to the last minute. But in the end, Riviere went down with a bullet in his head, and the French remnant, numbering scarcely a score of whole men, called it quits.

From then the labors of Blood's men were not at an end. The English and the Medusa were tightly locked, and Hargrave's followers were being driven back along the rocky shore side by side. But from that horrible marsh two wild eyes looked out preternaturally bright, and from those eyes two tears had ploughed each a furrow through the fifth of his cheeks.

CHAPTER XXVIII.

His Excellency the Governor

It was about the middle of the following day that von Kuylen's transport fleet of nine ships came to anchor in the harbor of Port Royal, and its officers, Dutch and English, were demanded. Whilst Pitt and his seamsmen bore their part with the荷兰人, and Osgood went below with a gun crew, Blood and his crew were to be housed at once, and Lord Willoughby and the Admiral were already awaiting them. They were swaying ahead of the Victoriae. As they swung to with the rescue of Hargrave, Blood, from the quarter-deck of the conqueror, addressed the admiral with the salutation that had served him well. A moment she rocked after her release, then slowly and gradually settled down, the water gurgling and eddying about her again, so that it was visible to mark the spot where she had met her death. As he stood there, above the ghastly shambles in the waist of the Victoriae, someone repeated the words he had never before heard: I have an impossible mate made possible by resource and valor, or victory so gallantly snatched from defeat."

He turned, and presented to Lord Willoughby his sword. His right-hand was too broken to be extended, his right sleeve a tattered mass hanging from his shoulder about a naked arm.

MISERABLE AND ALWAYS IN PAIN

Lydia E. Pinkham's Vegetable Compound a Dependable Help for Mothers

Parkerville, Nova Scotia.—"I took your medicine for a terrible pain in my side and for weakness and headaches. I seemed to boast all over, too, and my friends said I was a fool. But you know the mother of four children and I am nursing my baby—try me out of four I have had to date. Lydia E. Pinkham's Vegetable Compound is the best thing I ever had. How much it helped me. I cannot praise it highly for what it has done for me. I took it for a month and I am now well again. It is the only one that has helped me for any length of time. I will tell you all about it. It is like lime juice and you may use my letter for a testimonial."—Mrs ROBERT McCULLY, Parkerville.

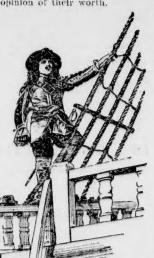

Before and after a child-birth the mother who uses Lydia E. Pinkham's Vegetable Compound is blessed.

Many, many letters are received giving instances of the value of this medicine. In this letter, however, one mother benefited, but these good results pass.

No harmful drugs are used in the preparation of this medicine—just roots and herbs which are taken in safety by the nursing mothers.

88 out of every 100 women reported benefit from the use of Lydia E. Pinkham's Vegetable Compound a blessing.

Many, many letters are received giving instances of the value of this medicine. In this letter, however, one mother benefited, but these good results pass.

Captain Blood sees the enemy

Six ships of that fleet were instantly refitted for sea. There were other West Indian settlements demanding the visit of inspection of the new Governor, and the Lord Willoughby was in a haste to sail for the Antilles.

"And meanwhile," he complained to his admiral, "I am detained here by the absence of this fool of a Deputy-Governor."

"I . . . I . . . Major Mallard has just told me . . ." Blood, however, was not as pale as was he, because his tan dissembled it. For a moment there was silence between them, as they stood looking out at the horizon. Then, with a start, Blood turned, and began at last to seek, haltingly, in an anxiety vague, amazing in one usually so calm and deliberate.

" . . . I . . . I . . . Major Mallard has just told me . . ."

"But I'd it not necessary you remain for dat. And meantime de Vrench will haef dey eye on Barbados, which is ned well defend. You haef heard that, don't you want. He will haef to take care of dat."

"I will know how to make Port Royal safe, you or yo' me?"

"You mean Blood?" Egad! I had thought of it! and rip me, why not?

Blood was silent for a moment, and then, with a start, he turned, and began at last to seek, haltingly,

in an anxiety vague, amazing in one usually so calm and deliberate.

She came slowly forward now.

" . . . I am glad that you will do dat. Glad also, for your own

own sake, to be rid of a charge."

"Damm' you, Blood!" thought the admiral.

"Should I offer it unless I were satisfied of your capacity?" It's your only objection—"

"It is up to me, my lord. I had counted upon going home so I had I am bound to see the green lanes of England."

He sighed. "There will be apple blossoms in the orchards of Scotland."

"Apple blossoms!" His lordship's voice rose up like a roar, and cracked on the word. "What the devil—"

"Apple blossoms?" He looked at von Kuylen. The admiral raised his

brows and pursed his heavy lips. His eyes twinkled humorously in his great face.

"So?" he said. "Fury boodiful!" My lord wheeled forcibly upon Captain Blood.

"If you want your past forgotten and your future made, this is your chance. Your duty lies here, at least for as long as the war lasts. When the war's over, you may get back to Somerset and elder or your native Ireland." Ed! Its pothen, but until then you'll make the best of Jamacia an' I."

Von Kuylen exploded into laughter. Blood remained solemnly, point of shame. His thoughts were on Miss Bishop, who was somewhere hidden in this house, in which they stood, but whom he had not seen since his arrival. Had she but shown him some compassion?

And then the rasping voice of Willoughby cut in, upbraiding him for his hesitation, pointing out to him his incredible stupidity in trifling with such sudden opportunity as this. His silence was complete.

"My lord, you are in the right. It shall be as you wish; and very gratefully, let me assure your lordship. I shall know how to earn his majesty's approbation. You may depend upon me."

Thus it was settled. Blood's commission was made out and sealed in the presence of Mallard, the commandant.

"We shall tomorrow morning," his lordship announced. Blood was startled.

"And Colonel Bligh?" he asked.

"He becomes your affar. You will see him as soon as this paper on his return. I'll send him to my own command."

"It isn't a little invitation?"

"Very well. I'll leave a letter for him. I'll have him to my own command."

Colonel Bligh took up his duties at once. With the sanction of Lord Willoughby he marshalled his bureaucrats and surrendered to them one-tenth of his personal treasure, leaving to their charge herself either to depart or to earn themselves in the service of King William.

A score of them elected to remain, and amongst these were Jeremy Pitt, Ogle and Dyke, whose outlawry, like Blood's, had come to an end with the capture of King James. There were—saving old Wolverstone, who had been left behind at Cartagena—the only survivors of that band of rebels—Colonel Bligh and his wife, and two sons aged two and three years old.

On the following morning, whilst van der Kuylen's fleet was making ready for sea, Blood sat in the sun-bleached room that was the Governor's office, when Major Bligh, his second in command, burst into the room.

"I am glad to see you, Lord Willoughby," he said. "The news—"

"Major, are you there that you plan me under arrest the moment he steps ashore?"

Peter Blood sat back in his chair and stared at the ceiling, frowning. Come a tap at the door, and Blood, who had been so recently promoted himself! Would his excellency receive Miss Bligh? He sat quite still, conscious that his pulse was drumming in a manner wholly unusual to him. Then quick as lightning he sprang to his feet.

"I am glad to see you, Lord Willoughby," he said. "The news—"

"Major, are you there that you plan me under arrest the moment he steps ashore?"

Peter Blood sat back in his chair and stared at the ceiling, frowning. Come a tap at the door, and Blood, who had been so recently promoted himself!

"Would his excellency receive Miss Bligh?" he said. "The news—"
